About LearnPro Group

Emergency services, healthcare, and other high-risk sectors depend on our solutions to ensure the safety and well-being of their communities. But we offer far more than products. The **LearnPro Group** way is based on our strong peer-to-peer network, extensive industry expertise, and collaborative approach. Our combination of software, talented people, and **valuable content** distinguishes us as a **preferred global partner** for digital transformation. We support 400 organisations worldwide, including nearly 100% of UK Fire & Rescue Services.

About LearnPro Group (Our Products)

learnPro

learnPro LMS enables your organisation to create, deliver and evaluate engaging learning content. You can assess and track individual and team progress, manage compliance, and share best learning practices. It also provides teams with a shared library of valuable pre-built and peer-generated content.

pdrPro

pdrPro is the UK's market-leading platform for competence management for Fire and Rescue Services. It is the only solution that integrates training, incident recording, course management, appraisals, development pathways, and equipment testing to ensure compliance. (Integrates with learnPro).

XVR^o

Our immersive XVR virtual reality simulation training platform enhances the competence and expertise of your personnel and enables content sharing with peer organisations. Learners can apply training theory, rehearse, and embed critical decision-making in a simulated, safe, interactive environment led by expert instructors.

firewatch

Created in partnership with the Fire & Rescue community, our FireWatch specialist ERP suite can connect prevention, resource planning, and response to reveal the complete picture of FRS operations. It integrates accurate real-time data across FRS departments for full visibility and greater efficiencies.

prevent+ protect

Prevent + Protect provides an integrated job management platform for prevention, protection, operational risk, and hydrants to streamline team workloads. It offers case, CRM, and task management and delivers a connected data repository for jobs, premises, contacts, and organisation details. (Integrates with FireWatch).

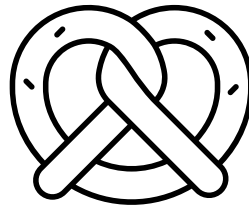

redkite

Redkite's leading ARFF training, competency, and asset management systems support airport, military, and industrial Fire & Rescue in the UK and Middle East. With a long history of excellence in aviation, clients include all major UK and large global airports, such as Heathrow, King Khalid International and Changi International.

Focus of this Session....

"To introduce a new total training solution product concept and to seek your feedback before we go into final development"

redkite

Exploring a content
partnership with

IAFPA 
International Aviation Fire Protection Association

Proposed Solution - Details

The goal is to allow existing Redkite CMS customers and new customers to seamlessly use the learnPro LMS module for accessing, editing, and hosting aviation-specific learning content (ARFF), while continuing to manage access and reporting in their familiar CMS environment.

- **Content Discovery (Search)**

- Customers can search a catalogue of prebuilt training in Aviation Rescue Fire Fighting (ARFF) e-learning content (currently exploring this aspiration with IAFPA).
- This ensures immediate access to high-quality, ready-to-use e-learning resources ensuring that firefighters are equipped with the necessary skills and knowledge to respond effectively to emergencies

- **Content Customisation (Edit)**

- The LAB Advanced Authoring Tool allows organisations to edit and tailor content to their specific service or operational requirements.
- This ensures flexibility and relevance for each customer and their unique situation and requirements.

- **Integration with CMS (Access)**

- eLearning content on learnPro will be directly linked from the Redkite system, enabling end users to access training within the current Redkite UI while ensuring minimal disruption to existing workflows.
- Clicking these links via Redkite will open the elearning content in the learnPro application.
- Once completed, assessment results in learnPro will be transferred to Redkite and will automatically update the competency of users in Redkite.
- All training progress is fully trackable

Total Training Solution

learnPro

SEARCH

EDIT

HOST

ACCESS

Search a catalogue of prebuilt Aviation-specific content

eLearning content can be edited to suit your own service requirements

eLearning content is hosted on the learnPro LMS.

Users will access content directly via Redkite UI. Competencies will be updated automatically

Currently exploring a content partnership with
IAFPA
International Aviation Fire Protection Association

Key Benefits

- Total trackable e-learning solution
- Seamless integration – Users will access learning via Redkite CMS, complete training on LMS with results being automatically transferred back to CMS to update competencies
- Content flexibility - Prebuilt validated aviation catalogue for fire and rescue plus the ability to edit and customise.
- Consistent user flow - All learner access and reporting remains in CMS, ensuring continuity for users and administrators of Redkite
- Additional reporting capabilities - Granular eLearning reporting available via learnPro LMS for further training and content analysis.

Next Steps

- We're interested in your feedback – please come back to myself or David with your thoughts
- We will use your feedback to inform the development of this solution over the coming months
- We will then work on a competitive and fair pricing policy
- We will aim to have the total training solution launched in Summer 2026.

Thank You
